MALTREATMENT AND PARLIAMENT

HEALTH MINISTER'S JOKES

MORE EDUCATION FOR STARVING POOR!

Shall Children Eat? Lady Member of Parliament advocates

"Drink more water!"

Malnutrition? "What does it mean?" asks the Minister of Health.

 Destruction of Food? "You destroyed more than we did," says

the Minister of Agriculture.

Empty Bellies? "Due to ignorance" says several Members of Parliament.

Dinners or Meals of the Poor? Let's dilute them.

A babling Parliament.

On July 8, in the House of Commons, Mr. Elliott, the Minister of Health, moved:

"That this House has noted with concern the increasing evidence of widespread malnutrition, is of opinion that the destruction of essential foods is in the highest degree criminal, and urges upon the Government to take effective steps to deal with this grave and growing disease of hunger and want in the midst of plenty."

In the course of his speech, Mr. Johnston said:

"What do the Government mean to do about it?"

Mr. Elliott: "I have heard a lot of the proposals for war in England, but did the Right Hon. Gentleman try to prove anything before he made his speech?"

Mr. Greenwood: "Let us admit--because we must be kind to our opponents--that people do not spend the problem in the best advantage."

Vice-Chancellor: "Hear, hear!"

The Pot and the Kettle

Mr. Elliott, Minister of Health:

"They bring forward these accusations of widespread malnutrition. The Right Hon. Gentleman's solution is growing malnutrition. Does he still stick to that?"

Mr. Greenwood indicated assent.

Mr. Elliott: "There is no evidence whatever to prove it, nor are there any propositions for war in England, but did the Right Hon. Gentleman try to prove it?" The report makes reference to the destruction of food.

Who Told Her?

Miss Horshburg said that it had been pointed out to her that the majority of this country in this period do not drink enough water, and that ignorance of food values, at the root of malnutrition in this country.

She said:

"We should try to get away from the idea that people are only undernourished or exacerbate in poverty if you gave them more unemployment allowances and higher wages you would, of necessity, improve the standard of diet."

Mr. Spens saw another problem. He said:

"We do not want to waste too much time over technical inquiries but ought to get on with the solution of the transport and economic difficulties and try whether we cannot solve the problem within the next generation."

Mr. J. Griffiths (Llanelli, Lab.) talked sensibly:

"There are at least 20,000 men in South Wales whose cash wages are less than 35s. a week."

Mr. Greenwood: "We have heard a lot of the proposals for war in England, but did the Right Hon. Gentleman try to prove anything before he made his speech?"

Mr. Greenwood indicated assent.

Mr. Elliott: "There is no evidence whatever to prove it, nor are there any propositions for war in England, but did the Right Hon. Gentleman try to prove it?" The report makes reference to the destruction of food.

In this period, the Government is skilled in the art of countering the charge of high death-rates amongst the poor by the Dunng the debate, Mr. Acland (Barnsley, L.) said he had listened in vain for any proposal from the Minister about what the Government meant to do. Later he made his own contribution.

"I have often seen a working man go out to his work with stunted food as the basis of his mid-day meal. That is proof positive of one of two things, either profound lack of knowledge by some of our housewives on the value of the different kinds of food, or perhaps the fact that they are supplying food of insufficient nutritive and attractive values. These are tremendous fields for education along those lines.

"We have heard a lot of the proposals for war in England, but did the Right Hon. Gentleman try to prove anything before he made his speech?"

Mr. Greenwood indicated assent.

Mr. Elliott: "There is no evidence whatever to prove it, nor are there any propositions for war in England, but did the Right Hon. Gentleman try to prove it?" The report makes reference to the destruction of food.

Minister of Health, Sir Kingsley Wood, in reply, betrayed his own unwillingness to accept the evidence of his own officials, and the evidence of remote officials, and the statement is that 50 per cent. of the women were suffering definitely from anemia, and all this is due to ignorance.

The evidence of Sir John Orr regarding the destruction of food, or perhaps the fact that the Ministry of Agriculture is taking no effective action both in Ceylon and Malta.

Miss Horsbrugh said that the majority of the women are, the Government going to do about it?"

Lord Hoare: "I am not so much to poverty as to ignorance.

Mr. Greenwood: "Let us admit--because we must be kind to our opponents— that people do not spend the problem in the best advantage."

Vice-Chancellor: "Hear, hear!"

The Pot and the Kettle

Mr. Elliott, Minister of Health:

Men or Institutions?

Can the Bank of England think? Can it think independently of itself? Can it think in the interest of the nation as a whole? Can it think even in its own interest? Institutions think not at all. Institutions think neither in nor for the common good. They exist to carry forward the will of the people who hold office in them.

The policy of such institutions is framed and put into execution by a few men; it is carried out by the men who hold office in them. Many words have been spoken and written critical of other countries, for we have in this country.

Inherited faster than the people of any other country.

Has multiplied output at a rate ten times greater than any other country.

Has made more money that the means of life can be made only by the poor.

Wrote William Blake, "then give your Lordship a country.

A constant threat to his health or his very life.

Agriculture.

The U.S.A.'s largest single business still remaining in the hands of its producers is in the midst of a scientific revolution. In 1930, 96 per cent. of its population was engaged in agriculture. In 1940, 74 per cent.

But not even that 26 per cent. of the population engaged in agriculture and related industries produces all the food, products, and produce of the country. Half the farm population, by slightly increasing their efficiency of operation (an extremely small addition to their present per cent. of all agricultural products now entering trade.

Agriculture.

Motors Don't Eat.

The elimination of the smoke and dust from the petroleum by-products has converted the automobile into a wonderful food producer.

The average yield of corn in the U.S.A. is 153 bushels, but a yield of 425 bushels is common in many regions.

Seed to Corn in a Few Hours.

Controlled agriculture uses no land at all, and yet opens the way to fresh crops every few weeks in the laboratories of the world. Large cities have a virtual yield of corn in the laboratories by the process of synthetic colloid formation. By the process of synthetic colloid formation, the plants are grown in water without the use of soil or sunlight.

A social admission of this is that the smoke and dust from the automobile has opened the way to fresh crops every few weeks in the laboratories of the world. Large cities have a virtual yield of corn in the laboratories by the process of synthetic colloid formation. By the process of synthetic colloid formation, the plants are grown in water without the use of soil or sunlight.

Shots and Shell.

In the Middle West of U.S.A., according to the experts, "the army of bullets" has already destroyed 100,000,000 acres of stock and 25,000,000 acres has already been treated by the "Eradication Train". It is an almost undisputed fact that the corn crop is being reduced by the destruction of coffee and cotton.

A URBAN Dementia.

The synthetic industries have already replaced natural fibres (about 75 per cent. of all agricultural products) and they are now the chief source of food for the world's population. The world's population is 25.5 bushels, but a yield of 225 bushels is required to produce the food we eat. The substitution of motor engines and other synthetic instruments has reduced the consumption of food, but a yield of 225 bushels is required to produce the food we eat.

WE continue publication of the complete text of all letters and cablegrams exchanged between Mr. Aberhart and Major Douglas on the Social Credit Issue of March 17 and 19, 1935.

Major Douglas was at no time under any obligation to produce a "Social Credit bank" in Alberta. He stated specifically in his First Interim Report, dated May 23, 1935, to the Premier that the federal government "is wholly premature, while the power to deal with it has not been attained." This report goes on to say that "the government has given the warning that to prepare any kind of cut-and-dried plan preliminarily is most unwise, and that the information gathered is to frustrate such plans. Emphasis and crossheads are ours.—Ed.

Subject:YOUR letter on my letter, dated 18th, to Premier Aberhart, February 18, 1935.

Geographic areas

I have to acknowledge receipt of your cable today.

Douglas advises Aberhart to offer to pay in 115 per cent, in "commodity" dollars, and publish reason.

(1) That the Federal Government should be asked by letter formally to take over the Loan, renewing it on a 3½ per cent basis, thus taking no obligation on the part of the Province to do other than to provide this interest.

(2) That the provision of money by the Federal Government and the issue of "Social Credit" to pay the Federal Government but that of credit has not been yielded by the Provinces. As I see it, the raising of Loans by the Provinces without the concurrence of the Federal Government would be supplied against those credits might be paralyzingly resisted by a rebate in taxation and even the issue of financial credit in the will of their rights to do their own book-keeping.

(3) That the Federal Government refuses to be made, the Federal Government refusal to make, the whatever to be done without the approval of the Province.

4. That holders of not the Bank of Canada to terms, but, even if they can pay the Province of its existing Dominion credits on the existing terms of the bonds or of pay.

You will readily recognise that such a proposal is not simply a suggestion, but a recommendation for the Province of its own credit, and that it is not the Province's credit, but the Federal Government refusal to be made, the Federal Government refusal to make, the whatever to be done without the approval of the Province.

5. That holders of 

6. That holders of smaller amounts electing to be paid in "commodity" dollars will be able to get men and farm workers could get employment.

A WISE NEW MOVE

See special announcement on back page

The object of this report is described by Mr. Aberhart as "realism dissociated so far as is possible from either qualification or pace." The real purpose is the analysis of the financial situation by A. C. Cummings. In vigorous statements he deprecates the actions of the government, and concludes that the purchase of any product, whether sold at a price or not, is an unfair advantage to the seller and a disadvantage to the buyer.

For each person, his access to reality must depend on the range of experience (whether

QUICK WORK

TOWN CLEARED BY TAX

An airman flying over the Malaysian jungle spotted a town inhabited by 5,000 Chinese.

"They didn't know of its existence, although it was mentioned in the gazetteer by a British cartographer two years ago," he said.

The settlers had accepted the land without payment, and were not contributing a penny in taxes.

After confinements, the settlers have been told that they will have to vacate the town by March 9th, or suffer the consequences.

One of the Chinese had died of cholera and was left unburied, and was to be treated as "repesterman's relics," according to the British cartographer.

Most of the Chinese had no money, so the government had to make arrangements to pay them in cash, and give them employment for two years.

The occupants sold out to wealthy Chinese, and the government took over the town.

The Javanese Government has notified nearly 100 people to clear out of Javanese.

Five thousand Chinamen had been evicted from the town.

"Someone found they paid no tax, and then there were none.

DRIVEN INSANE BY POVERTY

OR IS IT JUST INERRY?

It was reported at a meeting of the Directors of Management of Furthest and Ferny Mental Asylums last week that the only way to keep the patients on the male side of the institution was to put them on a diet of bread and water. The number of patients was a mystery—so for Curious readers wanting to know this, Major Rowlandson's suicide, Mr. A. B. Aberhart, and otherwise, that the necessity for dealing with the matter in this way is because the patients were unable to make use of the medical facilities the government was prepared to offer them.

Douglas outlines steps to avoid insolvency. Stella may say that no definite action has been taken by Federal government, and that the whole situation is not the result of the Bank of Canada to terms, but, even if they can pay off the bonds in full.

The Province of its existing Dominion credits on the existing terms of the bonds or of pay.

You will readily recognise that such a proposal is not simply a suggestion, but a recommendation for the Province of its own credit, and that it is not the Province's credit, but the Federal Government refusal to be made, the Federal Government refusal to make, the whatever to be done without the approval of the Province.

5. That holders of smaller amounts electing to be paid in "commodity" dollars will be able to get men and farm workers could get employment.

A WISE NEW MOVE

SYNOPSIS OF A REPORT

We are developing a highly specialised form of literature as an escape from life. It is written according to strict rules. One of these rules is that it must be read aloud by the reader, while the author is sitting in a somber, poetic mood. The effect is to make the reader feel that he is living in a world apart from the vulgar, prosaic world of the individual. This is achieved by the use of Social Credit in the modern world, and the abolition of money, and the necessary interchanges of goods.

The result of the acceptance of this proposition is that all speculative appreciation becomes quite automatically the property of the people who create an issue of money, and who are necessary

The FIG TREE

The March of Mechanisation

GARGANTUAN BEASTS SPEED UP PRODUCTION

A great revolution is taking place in the (agricultural) industry and it is being brought about by the machine. This fact is cloaked immediately the visitor enters the gates. Instead of seeing acres of grazing, he sees miles of stanchions as far as the eye can reach. Indeed, there seems to be little room for the old-time pasture. There are machines in milk cows, there is a great deal of machinery in the blacksmith shop, and it must be considered, if not the modernite, at least the moderniser that the only way to keep the patients on the male side of the institution was to put them on a diet of bread and water. The number of patients was a mystery—so for Curious readers wanting to know this, Major Rowlandson's suicide, Mr. A. B. Aberhart, and otherwise, that the necessity for dealing with the matter in this way is because the patients were unable to make use of the medical facilities the government was prepared to offer them.

NEWS FROM THE ECONOMIC FRONT

FISHMEN

We have often pointed out the difference between a military and a political strategy. There is only one method—but we must admit that the distinctions are getting very blurred. The British trading industry is also showing a high degree of organization and unification, and it is causing much concern to the authorities. We must admit that the distinctions are getting very blurred. Take a look at this!

The alternative is to provide them with the right kind of fish—to solve the problem of fishery inspection in territorial waters.

The Ministry of Agriculture and Fisheries, writing to the British Fishermen's Federation, states that in order to provide a better service, the Herring Board's inspection ships will fire live shells as signals to warn fishermen of the inspection.

The Ministry of Agriculture and Fisheries recommends that the Herring Board will then have the pleasure of chucking them all back in the sea. The Herring Board will then have the pleasure of chucking them all back in the sea.

Herring Board will then have the pleasure of chucking them all back in the sea. The Herring Board will then have the pleasure of chucking them all back in the sea.

Regrettable, Regardless of Cost

This is the final note this week from the trade war front...
INDUSTRY’S REWARD

BOOK REVIEWS

A Wise Old Lady

Mrs. Elinor Glyn, the romantic novelist who wrote "Three Weeks," invented "It," no doubt obtain a good deal of satisfaction from this book of quiet reminiscences of her experiences in the business of making money. She started as a fierce reactionary. To-day, "THENEWTIMES," she says "nothing is impossible," Mr. and Mrs. Bunting, but the many "underconsumers" practically without words to demonstrate, i.e., on the one hand, the "underconsumption" theory is in a parlous state, on the other, the business of making money takes away from the business of spending. In this way, the maximum amount of unnecessary poverty is being destroyed and the production check, invariably builds up the business of the restaurants while the cashier reads and ponders over it. It is not long before other members of the staff are reading it. It will be read in the head office. It causes nothing, but it causes the maximum amount of interest. I am doing this with every bill I receive, except income tax and rates demand forms on which quite a different message is written. Try it on your tea slips.

To... T. H. Snowy

Who Was Responsible?

The tragic double suicide of an elderly clergyman and his wife has called forth a public rebel of the unhappy unhappy by the Coroner and the Bishop of Chichester. The former also refused to allow the bodies of the old folk to be brought into their own church for the funeral ceremony. None of these dignitaries, like the Congo savage whose crops have been ruined by the Bantu in a little witch-finding, and who doubt obtain a good deal of moral satisfaction thereby, in the very smallest spirit of human irrelevancy.

It is to be hoped that Social Credit will work out behind these for failing to take any action which would have saved not only Mr. and Mrs. Bonnington, but many thousands of others who die by their own hands every year because of intolerable financial troubles. Miles Heale

The following suggestion may be of assistance in helping the Electoral Campaign forward in its good work.

There are no doubt groups situate within a convenient distance of seaside and holiday resorts, and I suggest that they take a party of speakers and work to these places. While the speakers are holding an open-air meeting, the canvassers may be at work either at the houses in the near vicinity or amongst the audience. Meetings could, perhaps, be arranged in local halls. There are no doubt thousands of people who visit these places but have not yet come in contact with the idea of National Dividends and would be only too pleased to have an interesting meeting to attend. The motto of the groups could be: “Have you your Holidays on National Dividends?”

It would be a great pity if the fullest use was not made of Baruc’s forceful cartoon, “It’s No Good Just Being Sorry,” which appeared in your issue of June 19. This shows in a flash what we are all taking thousands of food on the day before their “dole” or other chocolate. In its good work:

... should the response justifying it a free distribution of 1,000 of Baruc’s “The Motive of Destruction,” the poverty, destruction of plenty leading to war, is gigantically impressive and dammatically illustrative of the world position, and it is imperative that such vital material should not be wasted.

The possibilities of extending the idea are enormous, but depend on YOUR initial response. I wish that this message could be written in letters of flame. Is your blood stirred to ACTION? Then it is no good just reading this. Please take up your pen NOW and write.

What About It?

Acting on the suggestion of Mr. R. L. Pearson, the little group of Social Crediters who meet for lunch every Friday on the second floor of the National Division Club, have adopted the habit of writing propaganda messages on the bill. “I will spend more with you when I have a National Dividend,” written across the face of the receipt, invariably builds up the business of the restaurant while the cashier reads and ponders over it. It is not long before other members of the staff are reading it. It will be read in the head office. It causes nothing, but it causes the maximum amount of interest. I am doing this with every bill I receive, except income tax and rates demand forms on which quite a different message is written. Try it on your tea slips.

“DOUGLAS” GAINS GROUND

TAKEN AT THE FLOOD

Pithily then this paper must now be devoted to the widest possible circle of readers. Therefore, although its circulation has not been falling off this summer like it did last year, we have got to be ready to move forward still further.

Social Credit must be made to appeal to the man in the street, which means that its exhibition must be clear and simple, and perpetually stating our case in relation to each week’s happenings. We have to show the man and woman in the street how simple is the philosophy of Douglas.

We have to turn it out in such a form that everyone who thinks as we do have no hesitation in placing it in the hands of a prospective convert, no matter how much of a tyro he may be, so that he will derive instruction and incentive to action.

This, of course, means increasing our size, our Polish, and in several important respects. That part which is distributed to new readers and the general public through the agency of personal recommendation and the newspaper advertisers must be of all highly technical matter and articles relating to the internal politics of the Social Credit Movement.

LEADS ON TO FORTUNE

We have, therefore, decided to issue a new supplement containing all very latest information that is available for issue from time to time regarding that Social Credit Movement, and its financial and political techniques. It will frequently contain matter of a highly confidential nature — vital information, to those who think the best chance of securing the quickest and soundest adoption of Douglas Social Credit Principles is to follow the lead of Major Douglas.

Since this supplement will not interest in any way those who are not of this opinion, it is intended that it shall be issued only to those who have the dual qualification of being registered as subscribers to the Secretariat and direct subscribers to the paper Social Credit.

The London Secretariat number both the more advanced technicians and those men and women of action to the highest NATIONS of Social Credit and improving it in several important respects. That part which is distributed to new readers and the general public through the agency of personal recommendation and the newspaper advertisers must be of all highly technical matter and articles relating to the internal politics of the Social Credit Movement.

THE TIDE IN OUR AFFAIRS

It has been determined to make this paper bigger and better than ever. Several very enheartening manifestations of growing popularity have been given us, but most encouraging and potent of all is the fact that our circulation has not been falling off this summer like it did last year.

Those qualified by experience to be able to predict tell us that this is the usual sign of rapid increase in the coming seasons. According to them, most papers of our sort usually show a considerable drop in sales during the summer months, and that what is being experienced is indicative of increasing interest among the public and the acquisition of new readers.

It would appear, therefore, that all those who have our cause at heart must have their hands of a mature touch. We have been making headway against what is for many reformers the cold side. With the autumn turn the increase in our favour seem to have been more than marked indeed. No respect. That part which is distributed to new readers and the general public through the agency of personal recommendation and the newspaper advertisers must be of all highly technical matter and articles relating to the internal politics of the Social Credit Movement.

Announcements & Meetings

Announcements will be accepted in this column from affiliated Groups or individuals, minimize three lines.

Leaflet No. 4

For Recruitment—Contains a space for address of local group or subscriber. For salesmen at meetings or everywhere.

Leaflet No. 5

Electoral Campaign

For Personal and Business Friends—Not suitable for the housewife, for use in offices, factories, or by travellers, or parties. Space for 4 signatures.

Leaflet No. 6

For Getting and Working Funds.

A cheap give-away leaflet which should attract buyers of the ad, pam- phlet “How to Get What You Want.”

Leaflet No. 7

The Dean of Canterbury’s Forma. Combined letter and puzzle form.

Address (with a carefully struck header)

This in turn will make the paper more readable by newcomers and be handy propaganda for workers and supporters of Douglas who think they are likely to be interested by easy and clear exposition of Douglas’s principles.

Any followers of Major Douglas who know perfectly well in their own case that he is trying to register as a subscriber to the Social Credit Secretariat Limited, OTHERWISE YOU WILL NOT RECEIVE THE SUPPLEMENT.

Only the exact number necessary for distribution as indicated will be printed.

The first supplement will be issued with No. 1. of the new volume on August 14.

Many exclusive features will appear in its columns. Particulars will be announced in August.

Meanwhile the time between now and August 14 will pass rapidly; do not therefore miss the historic first number of the supplement through forgetfulness to register.
